

THE GYM

Seating Plan

500 seats a night · St Mary's Secondary School, Edenderry

500

SEATS A NIGHT

20 × 25

ROWS × SEATS

7 + 11 + 7

BLOCKS ACROSS

30 m × 18

m

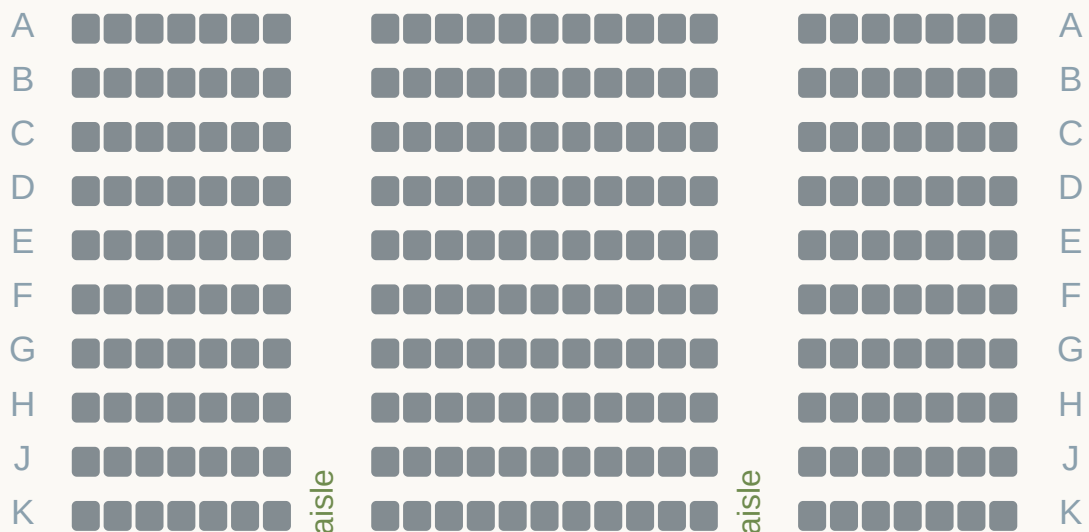

HALL FLOOR

The floor

STAGE

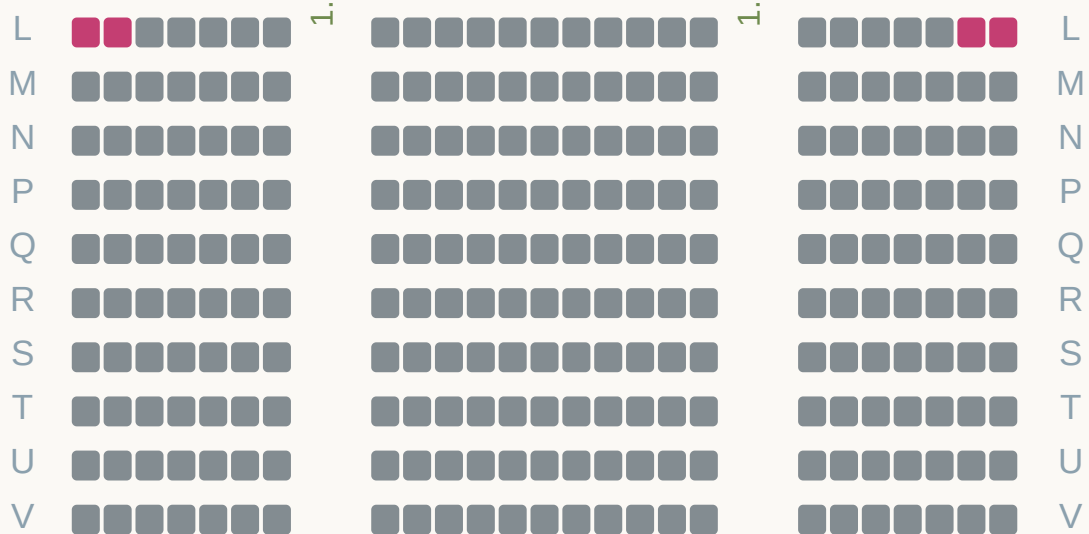

2 m clear

1.20 m aisle

1.20 m aisle

1.20 m cross gangway

3 m to the exits

18 m across

30 m deep

Drawn to scale. Seating occupies 14.90 m of the 18 m width and 29.20 m of the 30 m length, leaving 1.55 m at each side wall and 0.80 m spare at the back.

Where you sit

Every ticket has a seat number on it, so there is no need to arrive early to get a good spot. **Row A is nearest the stage** and the letters run back from there. Seat 1 is on your left as you face the stage, and the numbers run straight across all three blocks to 25 on your right — the row letter is on the end chair of every row, and stewards will be on each aisle.

The four seats marked on the plan are wheelchair spaces: the chair is taken away so the wheelchair stands in its place, right off the middle gangway with a companion seat beside it. Ask for one when you book — [tick the access box](#) at step five — and we will keep it for you.

Setting out

Measurements for whoever puts the chairs out. Every distance is from the wall the stage is built against, to the *front legs* of that row.

ROW	SEATS	FROM THE STAGE WALL	NOTES
A	25	8 m	First row — measure off the stage
B	25	8.85 m	
C	25	9.70 m	
D	25	10.55 m	
E	25	11.40 m	
F	25	12.25 m	
G	25	13.10 m	
H	25	13.95 m	
J	25	14.80 m	
K	25	15.65 m	
L	25	17.70 m	Straight after the cross gangway. Wheelchair spaces — leave out seats 1, 2, 24 and 25
M	25	18.55 m	
N	25	19.40 m	
P	25	20.25 m	
Q	25	21.10 m	
R	25	21.95 m	
S	25	22.80 m	
T	25	23.65 m	
U	25	24.50 m	
V	25	25.35 m	Last row — 3 m behind it to the exits

Before the chairs go out

- **Stagger the rows.** Offset every second row by half a chair (0.25 m) so each person looks between the two heads in front rather than straight at one. On a flat floor this is the single thing that makes the back half watchable.
- **Keep the stage at least 1.10 m high.** A seated eye is about 1.20 m up, so anything lower and row D onward loses the actors' feet. The back row is 25.35 m from the stage wall — if you can borrow tiering for the last few rows, use it there.
- **Tie the chairs together in rows.** Loose chairs in a public audience drift out of line and close the gangways; row clips or a cable tie through the frames keeps the 0.85 m spacing honest all evening.
- **Mark the floor first.** Tape the front line of every row and the edges of both aisles before a single chair goes out. Setting out 500 chairs by eye takes longer than measuring them.
- **Nothing in the gangways.** The two 1.20 m aisles, the 1.55 m at each wall and the 3 m at the back are the way 500 people leave. No extra chairs squeezed in on the night, however many people are asking.
- **Have the fire officer look at it.** The block sizes and gangway widths here follow the usual guidance for temporary seating, but the person who signs it off is the one whose opinion counts.
